Konstantin Rogozhkin

I am building bots using python and LLM.

Mar del Plata, Buenos Aires Province, Argentina

Summary

Konstantin Yurievich Rogozhkin

Specialist in Artificial Intelligence and Big Data

"Development of recommendation systems.

Development of chatbots for customer engagement.

Demand forecasting system development.

Text generation system development for job listings and resumes.

"Developed chatbots for companies like Leads, AISales, and a pilot project with T2. Over 2 million unique users have interacted with my chatbot."

Over the last ten years, specialized in developing AI and Big Data solutions. Developed a chatbot for AISales, leveraging NLP and machine learning to automate sales and customer support. Created a demand forecasting system using time-series and regression analysis to optimize online store inventory.
