DEEP EXPERTISE

Python
15+ years | Expert

FastAPI
Production APIs

pytest
Testing Expert

JavaScript/TypeScript
8+ years | Advanced

SQL
12+ years | Advanced

KEY METRICS

1M+ Users
Scalable systems

99.9% Uptime
Production reliability

70% Latency ↓
Performance optimization

LinkedIn Profile

SOFTWARE ENGINEER TUTOR | CODE QUALITY EXPERT

15+ years building scalable, high-performance systems with deep expertise in **code quality**, **testing**, and **debugging**. Specialized in curating AI-generated code to production standards, implementing comprehensive testing frameworks, and establishing engineering best practices. Proven track record: 1M+ users, 99.9% uptime, 70% latency reduction through systematic profiling and optimization.

TECHNICAL EXPERTISE

Code Quality
Code reviews, linting (pylint, ruff), type checking (mypy), comprehensive documentation

Testing
pytest, unittest, integration tests, E2E tests, test coverage, CI/CD pipelines

Performance
Profiling (cProfile, py-spy), optimization, caching strategies, async patterns

Debugging
Systematic debugging, logging, monitoring, error tracking (Sentry)

AI/ML
LLM integration, NLP/ML pipelines, AI code curation, model evaluation

DevOps
Docker, containerization, AWS (EC2, S3, RDS), CI/CD, infrastructure as code

PROFESSIONAL EXPERIENCE

NEiRA AI Platform
Jan 2024 - Present

Tech Team Lead / coFounder

Leading engineering team with focus on **code quality** and engineering excellence. Conducting **comprehensive code reviews**, ensuring adherence to industry standards for efficiency, scalability, and reliability. **Curating AI-generated code examples** and validating team's code output. Implementing **rigorous testing frameworks**, performance profiling, and debugging workflows. Establishing best practices and **mentoring engineers** in production-grade development.

Python 3.11+ | FastAPI | pytest | OpenAI API | LangChain | Docker

AIDA Finance Bot - AI Financial Assistant
Aug 2017 - Feb 2022

Tech Team Lead / coFounder

Led engineering team building scalable AI financial assistant serving **1M+ users** with **99.9% uptime**. Conducted **daily code reviews** ensuring code quality standards and best practices. Implemented **comprehensive testing frameworks** (pytest, integration tests), performance monitoring, and debugging workflows. **Mentored team** in Python/FastAPI optimization achieving **70% latency reduction** through profiling and code review feedback. Established **code quality standards**, security best practices, and **Docker containerization**. Supervised NLP/ML pipeline development with rigorous evaluation metrics, improving accuracy by 25-40%.

1M+	99.9%	70%	25-40%

USERS	UPTIME	LATENCY ↓	ACCURACY ↑

Python 3.9+ | FastAPI | PostgreSQL | Redis | AWS | Docker | pytest

CallProfit CRM

Jan 2015 - 2017

Tech Team Lead / coFounder

Led team of 5+ engineers implementing enterprise-grade Bitrix24 CRM with custom modules following **best practices**. Conducted **code reviews** for all REST API integrations ensuring comprehensive error handling and monitoring. Built automation workflows with **testing coverage**. Established code quality standards and mentored junior developers.

PHP | MySQL | REST API | Bitrix24

EDUCATION

Applied Informatics (Economics)

2007 - 2012

Vyatka State Humanitarian University

Specialist degree in Applied Informatics with focus on economic systems and software development.
